

GEOSCIENCE CAREERS IN INDUSTRY PROGRAM

—Connecting Industry and Students

This offering focuses our programs that connect industry and students into a day of progressive sessions (with optional sessions a day before for students and a day after for interviews).

Half-Day Student Workshop: Careers in Geoscience: Preparing to Launch Your Job Search

Saturday, 31 October

This workshop will help geoscience students successfully navigate the human resource professional procurement pipeline. It covers constructing effective cover letters, resumes, and CVs, and preparing for interviews that determine whether candidates gain entry into the professional geoscience workplace. **Industry representatives will contribute during the workshop**, giving students an idea of what they look for in experience and resumes. This workshop will help prepare students to interact with you throughout Sunday's sessions.

Student Research Highlight Session

Sunday morning, 1 November

This morning session gives sponsoring industry representatives and hiring managers an opportunity to become familiar with students and their work, begin dialogues, and get to know some of the brightest geoscientists soon to be entering the workforce. **The last hour of the session will give presenting students an advance opportunity to visit industry booths, prior to the larger afternoon session.**

Lunchtime Geology in Industry Q&A Panel

Sunday lunch, 1 November

This lunch, free to students participating in the career program (generally 300+ attendees) is centered around a panel representing various industries. Panelists answer questions, offer advice about preparing for a career in industry, and comment on the current and anticipated roles of geoscientists within their industries.

Geoscience Career/Professional Practice Session

Sunday afternoon, 1 November

The afternoon session switches gears and puts you, the corporate sponsor, behind the table to convey the unique culture within your company and the types of careers available, to answer questions, and to talk one-on-one with students. This is an opportunity to include your hiring manager or geoscience recruiter, and we strongly recommend that you also bring one or two of your recent hires to answer questions about their jobs and their work. You may use your allotted space creatively to display your company's work, sustainability initiatives, less-known projects in research, and other components that build awareness of your positive contributions to your communities.

Evening Reception

Sunday evening, 1 November

This informal mixer offers a networking opportunity for the career program's participating companies and students who presented in the morning session.

Companies interested in following the day with formal interviews on Monday may make arrangements to participate in our Employment Service Center: www.geosociety.org/employment_service/

Geoscience Career Program General Sponsorship

\$10,000 Sponsorships

Includes recognition and input during the Saturday Student Workshop, access to the morning Student Research Highlight Session, a table at the afternoon Professional Practice Session, and 3 tickets to the evening reception

\$5,000 Sponsorships
